	Examiner Robert Rose	Art Unit 3723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Receipt is acknowledged of Applicant's Drawings, filed January 3, 2007.
2. Claims 8-11 have been added.
3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 5-7, and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Myers(US 1928390) in view of Vicenzi(US 1901681).

Myers('390) discloses a grinding head comprising substantially all of the subject matter set forth in Applicant's claims above, except for the recitation of the bearing being received in a two-part connection piece. To make the connection piece of a two-piece construction, in order to allow the bearing connection to be easily assembled and disassembled for repair or replacement, would have been obvious in view of Vicenzi.

5. Claims 4, and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Applicant's arguments filed January 3, 2007 have been fully considered but they are not persuasive. Applicant argues that the primary reference to Myers('390) does not teach three separable and re-attachable elements in the form of a drive part, transmission part, and disk-shaped body part. However, it is

Art Unit: 3723

clear from figures 1-3 of Myers('390) that such an assemblage of parts exists.

Note drive part, defined by housing(15), and central shaft(14) with spherical bearing(26). Transmission part(40) and disk-shaped body part(31) are separately attachable by way of threaded members, (43), and (30)(32), respectively. The components may be separated and reattached by these fasteners.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Rose whose telephone number is (571) 272-4494. The examiner can normally be reached on Monday through Thursday, and on alternate Fridays, from 8:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail, can be reached at (571) 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
